

Plant Manager

- **Pharmaceutical/biological**
- **International company**
- **Senior executive role**

An international veterinary biologicals company requires an experienced Plant Manager to oversee its production operations in Armidale, NSW.

Reporting to the Manufacturing VP in Canada, you will lead a team of six in the production of the company's hormone products to GMP standard.

To be eligible you will require a relevant production background, ideally including biologicals or sterile pharmaceuticals, and the appropriate management and leadership skills. Familiarity with GMP or its equivalent is essential.

The position is based in Armidale, a charming university town of 25,000 located half way between Sydney and Brisbane and two hours from the coast. It offers a rare opportunity to combine an executive role with a regional lifestyle.

A competitive salary plus car and super are available. Reimbursement of relocation expenses will be considered.

If you think this is worth exploring call David Leyonhjelm for a confidential discussion or send your resume to the address below. Every contact is treated in strict confidence.
